PFOA,PFOS testing and removal

Set up for rabies clinic

Read water meters

Note would like to talk about option for getting a credit card. We are having problems finding some of the supplies we need and do not always want to set up net 30 accounts with companies we don't do business with often. I was not able to use town card to reserve room for training class being my name was not on card. Hoping with the past 30 years have shown that this will not be misused.
